

CARBON CHARTER CASE STUDY

Assington Autos achieve Gold status

Assington Autos Ltd is one of the largest licensed vehicle salvage and metal recycling companies in East Anglia. Based in Assington, vehicles have been salvaged and recycled at the site since the 1940s.

"Managing day-to-day business alongside our expansion has been and remains a hectic time. It was imperative that we had the assistance of Richard Jenner from Groundwork East, who went out of his way to help us in completing our Gold Renewal Carbon Charter Award. We wholly appreciated his patience, empathy, expertise and professionalism."

Daniel Collins,
Assington Autos

✓ Strong sustainability action

Implemented major energy-efficiency upgrades, including LED lighting & heat pumps. Future plans for solar PV, EVs and charging points & planting 1,000 trees.

✓ Reduced carbon emissions

Cut carbon emissions by 8.3% through smarter vehicle use and electric battery-powered saws.

✓ Clear environmental planning

Provided detailed carbon footprint data, an Environmental Policy and Action Plan, demonstrating a long-term commitment to improving sustainability.

✓ Community and environmental impact

As a major metal recycler, Assington Autos already contributes significantly to carbon savings, while also supporting the local community.
